

Dear colleague,

On behalf of the Cities for Life (CFL), OrganiCity, The World Bank and Open & Agile Smart Cities (OASC) teams, we herewith warmly invite you to a workshop that encourages policy makers and civic innovators to share experiences and develop recommendations on how to co-create smart cities for life **based on citizen's needs**.

**Some of the main questions we would like to address during the session are:**

1. How can I motivate and engage citizens in identifying emerging and existing urban problems, to express their ideas on how to solve them and conceptualize novel solutions?
2. Which tools can I use to get to know the needs of citizens in my city and engage them in smart city strategies and projects?
3. Which smart infrastructure is required in order to bring citizen ideas into action?

With a practical problem processing approach we will interchange experiences, ideas and define common challenges for cities to become **engaging smart cities**. After defining common challenges, we would like to identify their causes and work together to elaborate recommendations on how to solve them.

#### Agenda

- Welcome and introduction, OASC Chair, Dr. Martin Brynskov
- Smart Cities for Life, inspirational talk
- Co-Creation Session, facilitated by Cities for Life and OrganiCity
- Presentation of Results
- Launch of OASC 4th Wave
- Networking and Drinks

#### Time & Venue

Wednesday, February 17, 2016 from 16:00 to 19:00  
Smart City Expo Puebla, Puebla, Mexico  
Room 7 / Sala 7

The event is a side event to SCE Puebla and is open to all registered participants. Hosted by the Open & Agile Smart Cities initiative, in a partnership with Cities for Life, OrganiCity and The World Bank.
